Kaylynn,

For the **General** section below—which may be shared in a Wednesday bulletin email or Sunday announcement—it would be helpful to know whether each item came directly from a family member or was passed along informally by someone in the congregation.

We should make sure that any information shared publicly has been received from family members to protect privacy and avoid unintentional HIPAA-related disclosures.

Thanks for helping keep this consistent and helping us minimize any awkward situations.

HIPAA Reminder (Privacy Guidance)

While churches are not technically bound by HIPAA regulations, we strive to follow the same principles of privacy and respect. Health-related information should only be shared publicly (in bulletins, announcements, or prayer lists) when it comes directly from the individual or their immediate family. This helps protect confidentiality and avoid unintentional disclosure of personal or sensitive medical details.
